

THE DENTAL HEALTH SOLUTION

Exciting Clinical Breakthrough

There is now a simple, scientific, way to neutralize the root causes of costly dental and health complications before they occur.

**Prevent Cavities, Gum Diseases
Chronic & "Morning" Bad Breath
Enjoy A Fresh, Healthy Mouth
Improve your Immune System
Designed for Healthy Longevity**

**Sounds too good to be true?
It's natural to be skeptical but
read on - see why it is real!**

-  My professional reputation is built on honesty, integrity, and positive results—a responsibility I will never compromise.
-  To uphold patient trust, this protocol is rooted in evidence-based research from the ADA, National Library of Medicine, Harvard Health Publishing, and the Oral Health Foundation. By neutralizing five harmful biologic pathogens, this scientifically proven method delivers immediate outcomes, achieving a 100% clinical success rate across hundreds of patients within days.
-  **NOT A TREND - A ZERO COST ROUTINE USING EVERYDAY ITEMS!**

 Tired of the long videos, endless upsells, costly rare ingredients, pills, supplements, or ongoing subscriptions. Welcome to The Dental Health Solution. A single, one-time fee, gains you access to a science-backed, evidence-based evening routine that you manage entirely yourself. Taking just five minutes a night, this inexpensive protocol targets and neutralizes the five most harmful, completely useless bacteria responsible for oral and systemic damage—delivering you lifelong protection.

Lesson From Medical History

THE
NOBEL
PRIZE

Skeptics often dismiss revolutionary truths before they benefit millions. During the 1980s, the medical community dismissed the findings of Drs. Barry Marshall and J. Robin Warren, who suggested a specific bacterium (H Pylori) caused stomach ulcers. Experts at the time blamed lifestyle stress and diet. Dr. Marshall famously verified his theory by ingesting the bacteria himself to prove the truth—a daring move that completely transformed gastroenterology and offered a permanent cure for a chronic condition through a targeted antibacterial approach.

Following Medical History

Medical History is Repeating Itself.

Just as Drs. Marshall and Warren revolutionized medicine by proving bacteria—not stress—caused ulcers, our clinical research has exposed five absolutely useless oral bacteria actively driving oral and entire body destruction and complications. Safely, and easily, neutralize them before irreversible damage occurs.

New Superior Method
The Dental Health
Solution

Abandon the Old Method
Waiting For Problems

The science is clear! The tools exist!

A simple, science-based, evening healthcare protocol, takes 5 minutes, and safely neutralizes the root cause of all dental and many systemic complications: germs. No more waiting. No more damage. Immediate results.

Only \$24.95 now, to save thousands!

Why "Healthy" Mouths Still Need Immediate Protection

Don't Wait for Symptoms: Silent Bacteria Are Continually Attacking

Five useless, toxic bacteria are constantly attempting to trigger oral diseases, chronic inflammation, drain your immune system, and threatening your systemic health. You can now safely, and easily, neutralize these root microbial threats that we do not need immediately! Keep yourself healthy. Prevent irreversible physical damage!

Why carry these 5 destructive, useless, bacteria?

**Don't let them take YOU down
Take THEM ALL down!**

Drop them immediately!

Pathogen Bacteria

Oral Impacts

Systemic Links

P.Gingivalis(Ringleader)

**Destroys gum tissue and bone loss
Causes gum recession & bleeding
Deep pocket formation - loose teeth
Causes Bad Breath & Periodontitis**

**Binds local immune cells
Promotes mouth cancer
Alzheimer's & Parkinson's Heart
disease & joint pain Type 2
diabetes worsening Premature
births Bad Breath & Periodontitis**

F. Nucleatum (The Anchor)

**Supports Plaque Formation
Causes root canal infections
Leads to tissue death (necrosis)
Bad Breath "Morning Breath"**

**Drives severe gum disease
Colon & throat cancer
Crohn's & ulcerative colitis
Stillbirths & preeclampsia
Atherosclerosis**

T. Denticola (The Spiral)

**Thrives in deep gum pockets
Heavy bleeding & bone loss
Bad Breath Gingivitis Deep pockets
Bone loss and Ulcerative Gingivitis**

**Triggers intense local pain
Shuts down tissue repair
Cognitive decline & strokes
Buerger's & heart disease
Deep lung abscesses
Pancreatic & Gut Tumors**

T. Forsythia (The Shield)

**Creates protective biofilm
Melts jawbone via osteoclasts
Causes deep dental abscesses**

**Hampers white blood cells
Esophageal Cancer Arterial
calcification Airway infections
Insulin resistance**

S-Mutans (The Cavity Driver)

**Forms sticky plaque
Pumps enamel-dissolving acid
Causes cavities & pulpitis
Agonizing root-tip infections**

**Infective endocarditis
Brain bleeds & stroke
Fatty liver disease
Arthritis flare-ups**

THE DENTAL HEALTH SOLUTION

The Science of "Bacterial Load"

What is Bacterial Load?

Bacterial load is the total bacteria (including pathogenic and viral load) are measured in colony formation units in saliva, gums, and mouth. When this load exceeds your body's ability to control it, you develop a condition called dysbiosis.

How a High Oral Bacterial Load Weakens the Body

Suppression of Viral Defenses:

Constant bacterial overload causes chronic immune activation, depletion, antiviral immunity, and increased vulnerability to infections and diseases.

Bacterial Translocation:

Pathogenic bacteria enter the bloodstream, reach organs and triggering inflammation.

Immune System Exhaustion:

The continuous presence of large volumes of bad bacteria forces the immune system into a state of chronic, low-grade alertness. This constant "wear and tear" consumes vital white blood cells and energy, leaving fewer immune resources available to fight off seasonal illnesses like the flu, colds, or common respiratory bugs.

THE DENTAL HEALTH SOLUTION

Prevent Bacterial Damage Immediately For Only \$24.95

Toxic mouth bacteria are actively driving systemic destruction throughout your body. Stop this right now with a science-backed, 3-minute physical routine clinically proven across 100+ patients. It completely neutralizes the five unnecessary bacteria causing damage. This self-managed protocol attacks the root cause using everyday items you already have at home—requiring no additional cost, expensive clinical visits, pills, or prescriptions.

CASE 1: Mr. Donald C.

Chief Complaint & Presentation

Multiple loose teeth, chronic gum inflammation, and difficulty chewing. Given an unaffordable (over \$8,000) estimate by a periodontist. Scheduled an appointment to discuss extractions and dentures. Concerned about ability to wear dentures due to high gag reflex.

- Generalized bleeding and plaque
- Tooth Mobility
- Upper: Moderate to Severe
- Lower: Moderate
- X-rays: Bone loss around most remaining teeth

Intervention & Outcome

- Scaling and root planning (\$600.00)
- Placement of Atridox for initial antimicrobial and tissue healing Placed on The Dental Health Protocol
- Return visit two weeks, no bleeding, tooth mobility decreased Return visit four weeks, all mobility decreased, most teeth firm.

Result After 6 Months

ALL teeth firm, gums healthy, no more bleeding, noticed fresh clean breath, stable dentition. Chewing comfort restored

CASE 2: Mr. Stanley W.

Chief Complaint & Presentation

High incidence of dental caries (tooth decay). Gingivitis (irritated gums) and Bad "morning breath". Concerned about dental solutions.

Initial Exam:

- Gum recession in lower front
- Mild bone loss
- Tooth Mobility
- X-rays: Adequate bone for support

Intervention & Outcome

- Scaling and root planning
- Dental cleaning
- Cavities restored (fillings)
- Placed on The Dental Health Protocol
- Return Visit two weeks, "Morning Breath" gone.

Result After 6 Months

No tooth decay, all teeth firm, fresh clean breath.

CASE 3: Mrs. Barbara R.

Chief Complaint & Presentation

One tooth severely mobile (loose) - Was told to have it removed and a dental implant placed.

Initial Exam:

- Upper right first premolar tooth Grade 3 Mobility
- Bone loss - Bleeding Gingiva on probing
- Bone resorption on three sides of tooth
- X-rays: No infection - slight exudate

Intervention & Outcome

- Scaling and root planning
- Atridox
- Advised to wait 5 days, then use The Dental Health Protocol
- Return visit two weeks - no bleeding, gum tissue reattachment
- Return visit three months - tooth firming up - fresh breath

Result After 6 Months

Tooth fully firm Grade 1 (normal) Mobility

CASE 4: Mrs. Wanda D.

Chief Complaint & Presentation

Chronic gum disease, interested in non-surgical treatment.

High incidence of excessive calculus and tartar formation

Initial Exam:

Patient stated she felt her overall health was poor

- Bleeding gums
- Inflamed calculus
- Tooth Mobility
- X-rays: Moderate bone loss

Intervention & Outcome

- Scaling and root planning
- Dental cleaning
- Placed on The Dental Health Protocol
- Return visit two weeks - No bleeding, gums healthy

Result After 3 Months

Gum tight, no bleeding. Teeth firm - Health stabilized.

CASE 5: Mr. Joseph H.

Chief Complaint & Presentation

Severe peri-implantitis around loose mini implants under denture.

Initial Exam:

- Bleeding and swollen gingival tissue - loose mini implants
- Advised that this is the second set to fail in 10 months
- Unable to eat hard foods due to denture instability
- X-rays: Severe bone loss

Intervention & Outcome

- Remove all loose remaining mini implants
- Place four new mini implants - Reline existing Lower Denture
- Advised to wait 5 days then start The Dental Health Protocol
- Return visit after 6 months - Mini implants firm and stable
- Return visit One Year - Mini implants firm and stable.

Results Year after Year - Mini Implants firm & stable

These are individual, real-patient experiences and results may vary.
